DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 10-12 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Galitzer (5,792,142).

In regard to claims 10-12, Galitzer discloses an anchor device (figs. 1-15) including a cone-shaped head (10) having a wide end (42), a narrow end (54), three cutting edges (52, 54, 58), wherein the cutting edges are inherently sharp (enough to cut). The cutting edges come together to form a pointed tip (16) and the cutting edges are defined by at least one curved surface (concave curved facet, col. 3, line 41 to col. 6, line 62).

In regard to claim 14, a collar member (40) disposed near the wide end of the head.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 13 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Galitzer '142 in view of Borzone et al. (5,814,070). Galitzer discloses a suture anchor including a cone-shaped head having wide end, narrow end, three cutting edges forming a pointed tip and a shaft (12) (figs. 1-8, col. 3, line 41 to col. 6, line 62). Although, Galitzer fails to disclose the anchor comprising titanium and an eyelet on the shaft for receiving a suture, attention is directed to the Borzone et al. reference which discloses a suture anchor made from titanium (col. 4, line 24 to 29), the anchor including a cone-shaped head, a shaft and an eyelet on the shaft for receiving a suture (figs. 4 and 6).

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to make the Galitzer's anchor from titanium and employ a shaft including an eyelet for receiving and securing the suture. Doing so would provide a sufficient strength for the anchor and a better securing mean for securing the suture on the anchor.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rosenberg (1,978,145) and Simon et al. (6,264,677) disclose

anchorage devices including at least two cutting edges coming together to form a pointed tip.
